Keyword – Hotel Sales Channel Management – 1st Rank

The screenshot shows a Google search for "Hotel Sales Channel Management". The search bar contains the query, and the AI Overview section is expanded. The AI overview text states: "Hotel sales channel management is the strategic process of distributing a hotel's room inventory across multiple online platforms—such as OTAs, GDS, and direct websites—using centralized software to synchronize rates, availability, and bookings in real-time. It prevents overbookings and rate disparities, optimizing revenue by maximizing visibility." Below this, it lists "Key Aspects of Channel Management:" with a bullet point: "Centralized Control: A channel manager acts as a single interface, updating all connected sites (e.g., Booking.com, Expedia, Airbnb) simultaneously when a booking is made." A "Развернуть" button is visible below the AI overview. The top search result is from OtelMS, titled "Hotel sales channel management system | OtelMS", with a snippet: "A sales channel management system for hotels will allow you to easily integrate with the largest online booking sites and increase revenue without cost." A green box highlights the search bar, the AI overview text, and the top search result. A green arrow points from the search bar to the AI overview text, and another green arrow points from the AI overview text to the top search result.
